

High Density Patch Panel

1RU Rack Mount – HD Tray/Cassette with 144F Capacity

Description:

High density rack-mount patch panel for datacenter space and SAN's. Ideal network solution with great compatibility for interconnect and cross-connect between active equipment in switches/switch tiers and servers within the data center. Offers high density integration of splitter, splice, WDM cassettes with convenient cable management and accessibility.

Features:

- Compact & modular slide-out tray/cassette design
- High density 144F capacity to maximize rack space
- Easy access and installation of cassettes & fiber connections, with fiber routing in one or each direction
- Magnetic latch door with ID chart for port connectivity identification
- Front and rear fiber management
- Lightweight aluminum chassis with 6 cassette capacity and locking pins for each tray
- Variety of cassette configurations with LC, SC, MPO connectorization as splice, splitter, breakout, and mux/demux capability

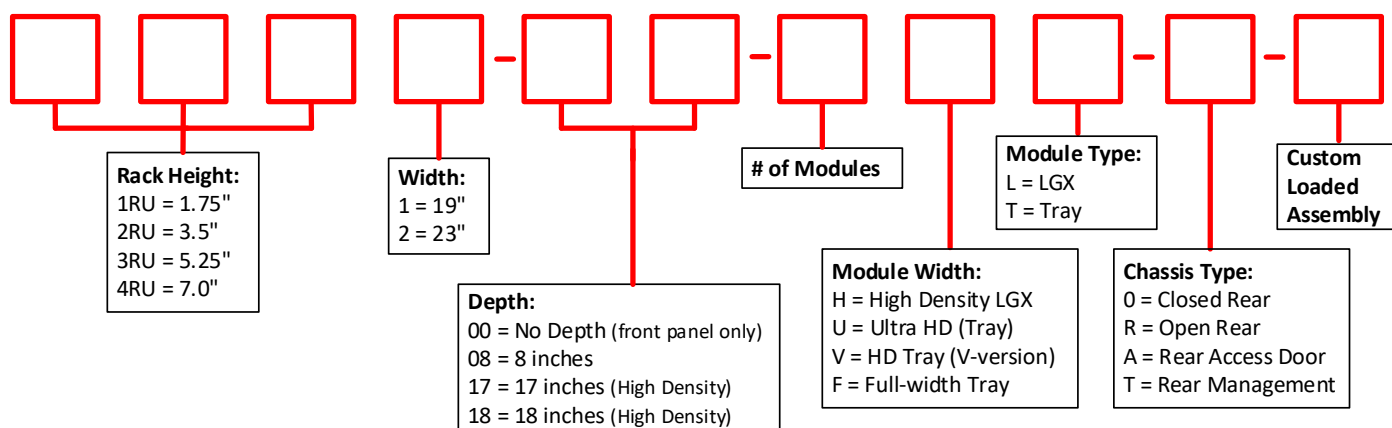

Accessories:

- Standard cassette modules with up to 3 MPO/MTP rear interface and 8F/12F/24F front connections
- Available modules for pre-terminated breakout/fanout, splicing, and splitter applications
- Multiple patch cord options with LC/SC and MPO/MTP connectivity
- Variety of trunk cables and harnesses such as MPO/MTP trunk assemblies, harness assemblies, compact trunks, QSFP/CXP to SFP+ harnesses
- Plug & play adapter panels for interface between MTP trunks and LC/SC patch cords, connectivity
- Customized cassette modules and cabling as needed
